1370 WLLN

Harnett's Most Power-Full Voice

5,000 WATTS

Mr.Bill Burrows
709 Division St.
Glouchester City, NJ 08030-2337

Mr. Burrows:

It was exciting to receive your letter and know that our signal was reaching as far as it was. Our wattage is 5000 watts during the daytime and 500 watts at night. As far as I know we have never received any sort of report from any ham operator in the past. Our format is Country . Once again, let me thank you for your letting us know about your reception of our signal.

Yours Truly,

Robert
